## PROFESSIONAL EXPERIENCE

Oct 2022 – Feb 2023

### JUST IT TRAINING LTD, LONDON

#### LEVEL 3 - DIGITAL SKILLS BOOTCAMP: SOFTWARE DEVELOPMENT

- Acquired confidence in my ability to understand and apply concepts that I was unfamiliar with.
- Gained hands-on experience in VS-Code IDE.
- Created a personal portfolio website and learned how to configure GitHub to store the source code.

## CERTIFICATIONS

April 2023

Coursera - Crash Course on Python by Google.

August 2022

Udemy - Java Programming for Complete Beginners.

June 2022

Udemy - JavaScript for Beginners Learn by Doing Practical Exercises.

## BOOTCAMP PROJECTS

### MUSIC APP

- Created and implemented the music database in VS Code using Python and SQLite.
- Used multiple file imports to keep the code clean and allow users to read, add, delete, and update records.

### A SIMPLE CALCULATOR

- Designed a basic calculator using HTML, CSS, and JavaScript.
- Enabled users to perform arithmetic calculations according to their input.

### RESTAURANT MENU

- Designed and implemented the three categories of mouth-watering food menu descriptions using HTML, CSS, and JavaScript.
- Provided users crave their offerings, and happy patrons come back many times.

### FLIP-CARD

- Created and implemented a flip-card image using HTML and CSS.
- Turn to a 3D effect when you hover over the image.

### PRICE-TABLE

- Designed the description of the pricing-table plan using HTML and CSS.
- Proposed an idea for the user to choose their required scheme from the displayed table.
